

Natural Spaces Domes

Our Dome home can provide you with a totally new experience in living - a spacious, open, airy environment.

Design flexibility allows you to have total freedom of expression in creating marvelous interior Dome spaces. You can even change your interior plan later and create a whole new design

Skylights let the moon and stars in and show clouds drifting by, lifting your spirits even on the dullest of days. Skylights create a panorama of nature scenes including the moon, stars and gently floating clouds. The outdoors is your wall art.

Imagine a gently curved ceiling over twenty feet high. You'll never again feel boxed in, just safe, comfortable, and snug.

It's time our houses were built for the way we live. The obsolete way may be the easy way to build today, but it won't give you your money's worth tomorrow.

ask the person who owns one

“We love our dome and the heating and a/c bills are so much lower than your friends homes.

I love the wooden panels. They were so easy to install, they're lovely to lok at and they don't crack like sheet rock.

It's a three-dimensional show place and nest, rolled into one. It's a joy to live here.”
